Macro Markets Feb 08 2022 Macro Markets puts forward a unique and authoritative set of detailed proposals for establishing new markets for the management of the biggest economic risks facing society. Our existing financial markets are seen as being inadequate in dealing with such risks and Professor Shiller suggests major new markets as solutions to the problem. Shiller argues that although some risks, such as natural disaster or temporary unemployment, are shared by society, most risks are borne by the individual and standards of living determined by luck. He investigates whether a new technology of markets could make risk-sharing possible, and shows how new contracts could be designed to hedge all manner of risks to the individual's living standards. He proposes new international markets for perpetual claims on national incomes, and on components and aggregates of national incomes, concluding that these markets may well dwarf our stock markets in their activity and significance. He also argues for new liquid international markets for residential and commercial

property. Establishing such unprecedented new markets presents some important technical problems which Shiller attempts to solve with proposals for implementing futures markets on perpetual claims on incomes, and for the construction of index numbers for cash settlement of risk management contracts. These new markets could fundamentally alter and diminish international economic fluctuations, and reduce the inequality of incomes around the world.

Macro Econ 5 Nov 05 2021

INDIAN ECONOMY A MACRO-THEORETIC ANALYSIS Aug 22 2020 India is an open economy, and the dynamics of it can be witnessed from the inflation and deflation of the rupee value in the market. This comprehensive book on Indian Economy shows how it behaves, and how its parameters are weighed and analyzed vis-à-vis the macroeconomic theories. This book attempts to make a more complete and clearer presentation of the basic models of macroeconomics principles, and their effect on India's current economic conditions. International Monetary Fund (IMF) thrusts upon New Economic Policy in India, which aims at leaving the allocation of resources entirely to the market forces deriving its rationale from neoclassical macroeconomics. This neoclassical macroeconomics is dealt with in a proper perspective in the book. Part I presents the basic models of open economy macroeconomics, and Part II applies them to explain India's recent macroeconomic performance. The book also assesses India's current fiscal policy, monetary policy and the policy of forcible land acquisition for promotion of modern industry. The book is designed as a reference for the undergraduate and postgraduate students of Economics
